Shawn McCrum

Computer Technician, IT, Web Developer, CRU Supervisor

I have always had a fascination with technology. As a child I built my own computer. While attending High School I worked at a local computer shop. I acquired a base knowledge not only computers, but, customer service, and business ethics too. While attending college I used my skills to team-up with a like-minded friend to start a business. We accepted job varying in difficulty; testing our skill while also giving us first-hand experience interacting with clients. Mainly we would create and maintain websites and social media accounts for our clients. Occasionally, we accepted jobs: installing security cameras, repairing computers / laptops, and installing sound systems. Continue reading my resume for the rest of the story.

Personal Info

Address
Zephyr St.
Arvada, CO, 80004

Phone   : (201) 956-5546
